

Launcher Icons

Launcher Icons are the icons which will represent your application when installed on your phone.

Google recommendations about the development of launcher icons can be found [here](#).

Setting a launcher icon in an application is easy.

Designer

The screenshot shows the 'Properties' window in Android Studio, specifically the 'Screen1' tab. The 'Icon' field is expanded, showing a dropdown menu with 'None' selected. Below the dropdown are three buttons: 'Upload File ...', 'Cancel', and 'OK'. A callout box points to the 'Upload File ...' button.
